

## Conveying Equipment

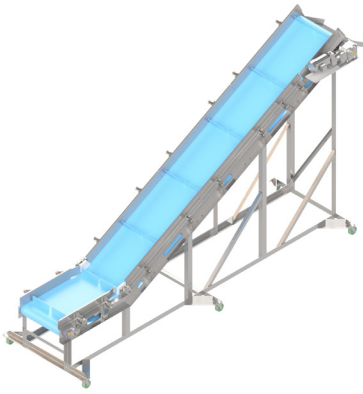

MTC Conveyors provide customers with reliable and durable ways to transport frozen and fresh products efficiently, reducing on-site material handling costs and increasing productivity. MTC Conveyors are made of best-in-class materials, designed to withstand large workloads; their stainless-steel construction ensures long life and ease of sanitation. MTC builds custom screw conveyors, belt conveyors, and storage loaders in portable and stationary configurations to solve your product transportation needs.

FEATURES	BENEFITS
Heavy duty construction	High dependability and reduced cost of operations
Stainless steel construction	Long life and ease of sanitation
Advanced safety features including proximity switch-doors	Ensures safety of operation and prevents accidents
Available in many different sizes, widths and lengths	Suitable for all types of work areas and products

MTC MTCB Series

#### Belt Conveyors

MTC Belt Conveyors are custom made, come in many different widths, and lengths, and are available in stationary or portable models. Their stainless-steel construction ensures long life and ease of sanitation. MTC conveyor belts vary in style based on the job requirements. All belts are non-porous, non-absorbent PVC to help prevent contamination. Standard Conveyors come with push-button controls but can be automated using a PLC to streamline your process. Conveyor options include reversible motors, rare earth magnets, or metal detectors

MTC MTCS Series

#### Screw Conveyors

MTC Screw Conveyors are designed to move frozen and fresh product from one location to another. They come in various configurations, including portable and stationary. MTC Screw Conveyors are available in diameters from 6-inches to 24-inches to fit your needs. All units feature stainless steel construction, sanitary design, grates and hinged trough covers with safety interlocks. Additional safety features include door and grate latches. Options include reversible motors and rare earth magnets.

MTC MTCS Series

#### Storage Loaders

MTC Storage Loaders are a variation of screw conveyors used for temporary storage or surge in a production process. They can be used for continuous formulation or metered control. Custom hopper sizes and capacities can be provided to meet any production requirement.
