

# KC-LIFTER Series

## SPECIFICATION SHEET

### MTC Kitchen Cart Lifter

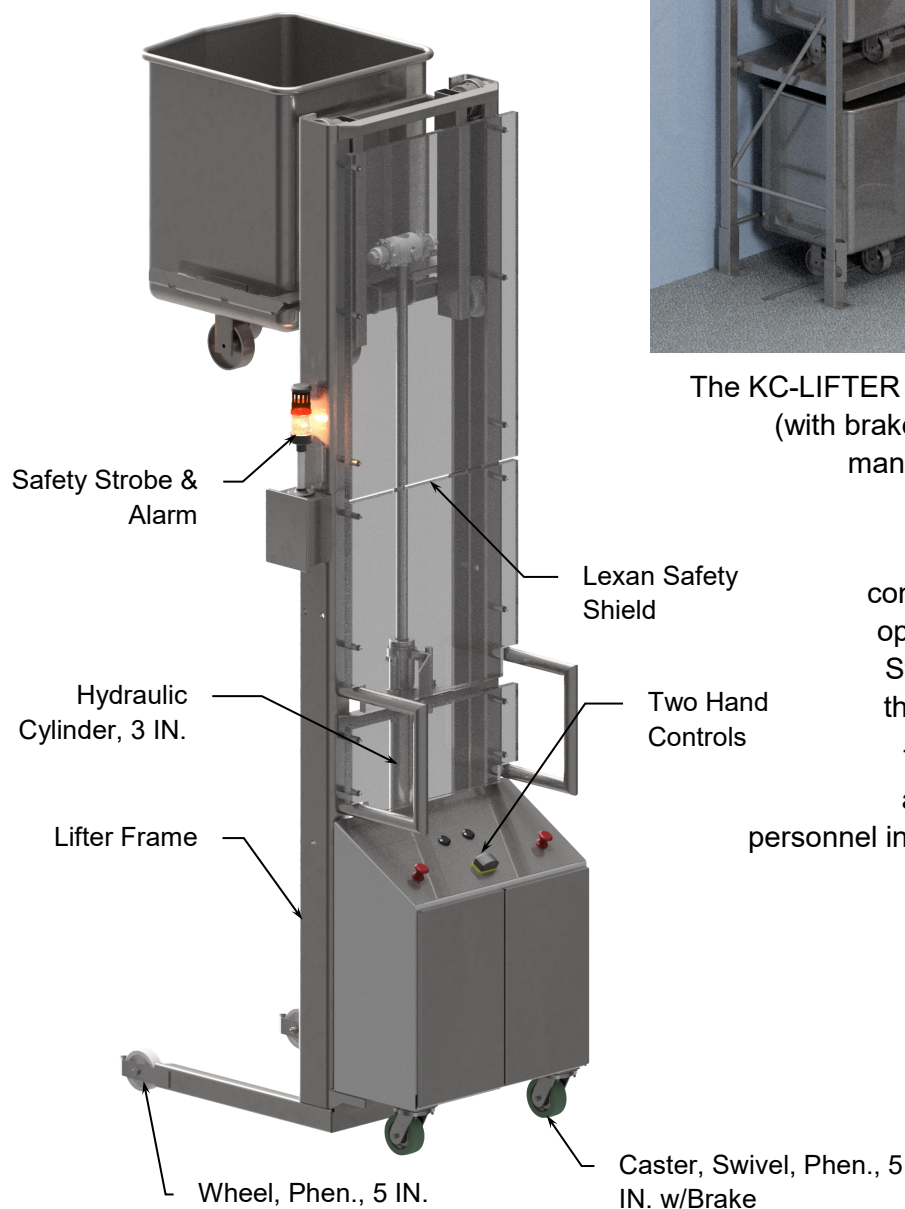

The MTC Model KC-LIFTER, designed to provide a safe and economical solution for lifting and storing kitchen carts in a sanitary environment. The KC-Lifter utilizes a 1 HP hydraulic power unit and a 3" hydraulic lift cylinder to lift kitchen carts up to 89 inches. Kitchen carts can be stored up to three rows high for extended periods of cooling, pickling, hardening or ripening, using the KC-RACK Series Modular Rack System.

The KC-LIFTER utilizes heavy-duty 5" swivel casters (with brakes) on the back to allow operators to manually move loaded kitchen carts with ease.

Two-hand hold-down, push-button controls are located in the center of the operator console, and one Emergency Stop button is located on each side of the operator console for convenience.

The KC-LIFTER employs an audible alarm and a safety strobe to warn all personnel in the area when the hydraulic lift is in motion.
